Correct Summer Sun Damage With Laser Treatments

ANTHONY S. LOMBARDI, MD, FACS
THE LOMBARDI PLASTIC
SURGERY CENTER

Did you injure your skin this summer, did you get a sunburn or did you just achieved a "healthy glow".

Enjoying the sun at the Jersey shore causes injury to your delicate skin. Even with sunblock you are still causing premature aging and wrinkles. The more time you spent at the beach or in your pool the more your skin needs attention now. Sunblock can help, but it does not offer total protection from the ravages the sun does to your skin. It's now the perfect time to fight back, and to rejuvenate your skin's appearance. Sunspots, pigmentation, freckles and wrinkles are the long term effects of enjoying too much summer sun.

You can erase the damage and obtain smoother and less pigmented skin with a professional laser treatment performed by board certified plastic surgeon Dr. Anthony Lombardi.

Dr. Lombardi's laser center offers a variety of laser treatments for many skin problems and conditions. The sun can cause brown spots, freckles, wrinkles, red vessels and dry dull skin.

Did you know that all these problems are correctable with laser treatments?

Dr. Lombardi recommends **Fraxel** laser treatments for most patients with sun related skin issues. **Fraxel** is considered the gold standard for treating wrinkles and pigmentation, this system removes a portion of the skin while leaving healthy skin behind to allow for rapid uncomplicated healing.

Dr. Lombardi has an outstanding record of using these lasers safely while obtaining outstanding results. "Microdermabrasion and IPL treatments can't compare to the results of laser treatments, you will see and feel the difference of these laser treatments in less than one week". There are many cheap lasers that try to imitate Fraxels success of safety but as a friend and a physician to my many patients I can only recommend the Fraxel system to treat the delicate skin of the face. These are all in office procedures that only require topically applied numbing creams and cool air for comfort and based on the patients needs we can remove pigmentation and fine lines or tighten the skin and remove deeper wrinkles. Forget about the old days when laser treatments were complicated

and required a prolonged recovery. The new lasers are made for quick results and recovery, you can have a treatment on Monday and have a great result by Friday night. Fraxel laser treatments are considered the laser of choice for safe and effective laser treatments and Dr. Lombardi has the experience to obtain your best result. "I have now performed over one thousand Fraxel treatments and I know how to individualize treatments to each patients concern". There is no substitute for experience when it comes to lasers, Dr. Lombardi has received a great deal of patient praise as to the manner how he treats his patients and the satisfaction that they feel from the results of these treatments. Afterwards, his team of aestheticians can guide you in the proper way to maintain your new appearance and to avoid any further injury to your skin. When you have a laser treatment compare it to having new sod placed on your property, it looks great but you know you need to protect it and nourish it to maintain its beauty for a lifetime. This is why after your laser treatment Dr. Lombardi will continue to work with you to

make sure you continue to nourish you skin. Maybe your lucky enough or young enough or didn't get enough sun to create enough damage to warrant a laser treatment. Dr. Lombardi's team still can help to get your skin back into proper balance. Some patients can benefit from Retin-A or a mild chemical peel, some only need better skin care products to improve the texture, tone and pigmentation of their skin. The main point is not to be afraid to come to the office for help. "We all had a long hot summer, everyone's skin needs to be evaluated and treated to some extent". Many people are misled by the notion that plastic surgery is only for the rich and famous, not in our office, we treat everyone based on their needs and what they want to accomplish while still being sensitive to the financial constraints that each individual has to deal with. Never be afraid to ask your doctor for a less expensive option whatever you are dealing with, there are always options that can be offered to make your choice the best one for you. So don't hesitate, it's your skin and you need all the resources available to protect,

rejuvenate and to nourish it. Dr. Lombardi will be glad to discuss your concerns and to explain your best options.
